WORK EXPERIENCE

QuoteMedia, Inc. - Intermediate Front End Developer
August 2022 - Current
Developed responsive web applications using Astro and Vue.js for the marketing team, including customizing financial web widgets (Qmods). Public project: https://catalog.quotemedia.com/trading

SpeakHabla - Full Stack Developer
April 2022 - September 2022
Developed BELA (Business English Level Assessment), a website built using ReactJS and Firebase.

IBM / SLiDE - Front End Developer
September 2021 - December 2021
Developed a progressive web application using ReactJS in partnership with NBIFC. Assisted with user testing and provided ongoing maintenance for multiple Wordpress sites for SLiDE clients.

PROJECTS

Ykdevelops : React JS + Firebase
Developed a responsive website to showcase software development portfolio and serve as a platform to practice ReactJS skills. Recently incorporated React Three Fiber into the project.

MyJourneys : React Native + Firebase
Developed a React Native app that utilizes Firebase to store a user's geolocation when they initiate a journey.

ARImageTracking : Swift + ARKit
Developed an iOS AR app that scans coupons and displays advertisement videos with a top label and bottom link.

ARFaceTracking : Swift + ARKit
Developed an iOS AR app for face tracking, capable of detecting specific facial expressions and providing a text response.
